STEP 1 **DETERMINE THE NATURAL & EXISTING LEVEL**

Using the L'ANZA Healing Color level finder, identify: • Natural Level (NL) - the level of natural pure virgin hair that has not been previously colored, lightened or chemically altered.

• Existing Level (EL) - the level of previously colored, lightened or chemically altered hair.

STEP 2 **DETERMINE THE TARGET** COLOR DESIRED

Changing level requires specific formulation & must be considered to ensure exact final results. Determine Target Color (TC).

Are you going lighter or darker? How many (if any) levels?

What is the natural undertone at the starting level or at the target level?

STEP 3 **DETERMINE THE UNDERTONE** FOUND AT THE EXISTING LEVEL This is an easy determination once you've established

Steps 1 & 2. Is the final color hue of the TC changing? Is it red, orange, yellow, etc? When formulating, you will need to determine if you want to maintain, neutralize or enhance the natural undertone to achieve your

STEP 4 **FORMULATE**

Confirm the change in level at the proximal new growth, medial mid-shaft and distal porous ends of the hair to achieve the target level and tone. This step will help you choose the appropriate color to use (Permanent, Demi Permanent or Demi Translucent) and developer level for each shade and section of the hair strand.

CONSIDER:

1. NATURAL & EXISTING LEVEL 2. TARGET COLOR DESIRED

3. UNDERTONES FOUND AT NATURAL/EXISTING LEVEL (when lifting) OR TARGET COLOR (when depositing) 4. SELECT SHADE & DEVELOPER VOLUME

Formulate according to your findings and choose Permanent, Demi Permanent or Demi Translucent Color with the appropriate volume of developer to achieve your final goal.

SHADES & FAMILIES

FAMILY	LTR	BASE	RECOMMENDED USE
ULTRA NATURAL	NN	Natural 100% Balanced	Formulated with double pigmentation for exceptional gray coverage. Perfectly balanced for true-to-tone and on-level natural color results when covering gray and deep, full-bodied color on natural hair. Delivers resistant gray coverage in one step, while achieving the level of depth suggested on the marker.
NATURAL ASH	NA	Cool Natural 88% Balanced 12% Blue-Violet	Formulated with double pigmentation for exceptional gray coverage. Cool Balanced base with blue/violet tones to control warmth for cool, neutral results. Can be used alone or added to color formulations for gray coverage or tonal balance.
NATURAL VIOLET	NV	Balanced with Violet 100% Cool-Balanced	Balanced base with a hint of violet to control gold tones for cool natural results. Can be used alone or added to any shade.
NATURAL	N	Balanced 100% Balanced	Perfectly balanced to reflect naturally occurring tonal values. Use alone or add to color formulations for gray coverage or tonal balance.
ASH	А	Blue-Green 60% Balanced 40% Blue-Green	Perfectly balanced to deliver natural ash results. Blue-green base consistently controls unwanted warmth.
EXTRA ASH	АХ	Green-Green-Blue 50% Balanced, 40% Green, 10% Blue	Balanced, natural-looking ash with additional control over warmth.
BEIGE	В	Yellow-Green 60% Balanced, 40% Yellow-Green	True, natural beige without unwanted red tones.
BEIGE-COPPER	вс	Yellow-Green-Orange 60% Balanced, 30% Yellow Green, 10% Orange	Rich beige with added copper tones. Beautiful alone or when added to any color series.
GOLD	G	Yellow 60% Balanced, 40% Yellow	Brilliant gold - perfectly balanced to deliver vibrant warmth when used alone, or to impart rich golden tonal balance to any shade.
GOLD-COPPER	GC	Yellow-Orange 60% Balanced, 30% Yellow, 10% Orange	Provides rich golden tones with enhanced warmth from copper hues.
NATURAL COPPER	NC	Balanced with Orange 90% Balanced, 10% Orange	Balanced base with a hint of orange creates a rich natural copper.
COPPER	С	Orange 60% Balanced, 40% Orange	Warm copper creates radiant tones.
COPPER-GOLD	CG	Orange-Yellow 60% Balanced, 30% Orange, 10% Yellow	Ideal to create naturally occurring copper shades with rich, gold undertones.
ULTRA COPPER	сс	Orange-Orange 50% Balanced, 50% Orange	Ultra rich copper for a bold, vivid effect.
ULTRA RED-COPPER	RRC	Red-Red-Orange 40% Balanced, 50% Red, 10% Orange	Fiery red and copper tones. Use alone for maximum impact, or layer into any shade.
RED	R	Red 60% Balanced, 40% Red	Cool reds add depth.
ULTRA RED	RR	Red-Red 50% Balanced, 50% Red	Beautiful and bold. Contains additional red pigments for added depth and ruby-like intensity.

*Can be used alone or added to any shade.

Violet browns create burgundy hues.

Red and violet merge to create velvety jewel tones.

Pearls create violet-blue tones that control warmth.

SHADES & FAMILIES

FAMILY	LTR	BASE	RECOMMENDED USE			
PEARL MIX	Р	Violet-Blue	Enhances neutral and cool tones at lighter levels. Controls golden warm tones at lighter levels.			
SILVER MIX	S	Blue-Violet	Enhances neutral and cool tones at lighter levels. Controls warm tones at lighter levels.			
GOLD MIX	G	Yellow	Enhances gold tones, adds warmth. Reduces violet tones.			
COPPER MIX	С	Orange	Enhances orange and copper tones. Adds warmth. Reduces ash tones.			
RED MIX	R	Red	Enhances red tones. Adds warmth.			
VIOLET MIX	V	Violet	Enhances violet tones. Controls yellow tones and brassiness.			
BLUE MIX	В	Blue	Enhances blue tones. Controls orange tones. Deepens ash tones.			
SUPER LIFT ASH	200A	Blue-Green				
SUPER LIFT EXTRA ASH	200AX	Green-Blue	Achieve 5 levels of lift with greater refinement of tone and control of warmth. Recommended for Levels 6 and under.			
SUPER LIFT PEARL	200P	Violet-Blue				
SUPER LIFT 200V Violet		Violet				
ULTRA LIGHT BLONDE BOOSTER	100	Balanced				
ULTRA LIGHT ASH BLONDE	100A	Blue-Green	Achieve up to 4 levels of lift. Ideal for lifting from Level 7 and higher. Can			
ULTRA LIGHT BEIGE BLONDE	100B	Yellow-Green	also be formulated as a Demi Translucent Color and used as a glaze.			
ULTRA LIGHT PEARL BLONDE	100P	Violet-Blue				
ULTRA LIGHT VIOLET BLONDE	VIOLET 100V Violet
